Shanaya Arora *Full Stack Developer (FE) - Angular*

shanayaarora8@hotmail.com 8958229228 Delhi, India linkedin.com/in/shanaya-arora-77a0a3359/

SUMMARY

Frontend-specialist full stack developer with 3+ years at an IT consulting and services firm, independently owning and delivering 4–6 client-facing products across **banking, healthcare, retail, and transportation verticals**. Operated within a 50-person engineering org, consistently taking sole ownership of frontend architecture from Figma handoff through to CI/CD deployment. Built applications used in live production environments by real enterprise clients — with zero production-down incidents across all managed releases.

EXPERIENCE

Full Stack Web Developer 11/2022 – Present

Advanta Innovations

- **Sole frontend owner on 4–6 enterprise client projects** across banking, pharmacy, retail, and transportation — responsible end-to-end from requirements to production, within a 50-person engineering team.
- **Independently architected and delivered an internal banking dashboard** for a leading Canadian multinational bank — built the full Angular frontend, integrated multiple REST API endpoints, and shipped 2 sprints ahead of schedule.
- Replaced a manual spreadsheet workflow at a pharmacy client by **building a barcode-scanning Angular application from scratch**, reducing warehouse data-entry errors by ~60%.
- Delivered a **real-time GPS fleet tracking UI** for a transportation client enabling live visibility across 100+ vehicles, replacing a manual check-in process that ran every 2 hours.
- **Reduced frontend release cycles from 2 days to same-day** by owning CI/CD configuration on Azure DevOps and Jenkins across Dev, QA, and Prod — zero rollbacks on any managed release.
- Shipped **15+ Figma screens per sprint** as production-ready, responsive Angular components using Angular Material and Pill library — every screen passed design sign-off on first review.
- **Integrated 20+ REST API contracts** across Node.js and PostgreSQL backends covering auth, case management, and live data feeds; authored all endpoint documentation for client handoff.
- **Mentored 3 junior developers** through weekly code reviews on GitLab, cutting PR rework cycles by ~30% within two quarters and reducing new hire onboarding time.
- Resolved **5 production-threatening performance bottlenecks** via GCP log analysis before any client-visible impact — maintaining a clean incident record across all projects.
- Sustained a **95%+ sprint delivery rate** across simultaneous multi-client workstreams using JIRA and Azure Boards in a high-pressure consulting environment.

EDUCATION

MCA - Full Stack Development 01/2026 – Present

Lovely Professional University

BCA - Computer Application 2022 – 2025 | Dehradun

Graphic Era, Deemed To Be University

SKILLS

- JavaScript (ES6)
- Angular (v13+), Angular Material
- Node.js
- Git, GitLab, Azure DevOps
- Jira, Agile, CI/CD
- TypeScript
- HTML5, CSS3
- REST API Integration
